DETAILED ACTION

1. Claims ⁴¹42-50 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 15, filed 4/17/03.

2. Claims 21-⁴⁰41 remain under active consideration in the case. Upon further review it has come to the attention of the examiner that several patentably distinct species are claimed. The following election of species is provided to give the applicant an opportunity to elect a single species and subspecies for further prosecution at this time.

Election/Restrictions

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1, the system comprising a tax refund from a governmental entity and an individual entitled to receive the payment of the tax refund, of claims 21-26.

Species 2, the system comprising a tax refund from a governmental entity and an individual entitled to receive a payment related to the tax refund, but not necessarily the tax refund payment itself, as claimed in claims 27-32.

The following species are subspecies of the above two species

Subspecies A, wherein the amount of the spending vehicle is equal to the value of the assignment of the right to receive the payment of the refund, as claimed in claims 22, 28 and 34

Subspecies B, wherein the amount of the spending vehicle exceeds the value of the assignment of the right to receive the payment of the refund, as claimed in claims 23, 29 and 35

Subspecies C, wherein the amount of the spending vehicle is less than the value of the assignment of the right to receive the payment of the refund, as claimed in claims 24, 30 and 36.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (either of species 1 or 2) and a single disclosed subspecies (either of subspecies A, B or C) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 33 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 3624

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
